

A high-speed, close-up photograph of water splashing, creating numerous bubbles and intricate patterns of light and shadow. The water is clear and dynamic, filling the entire frame.

Century ALUMINUM

natur-AL™

Low-Carbon Aluminum
Made in Iceland

Low-Carbon Aluminum for Premium Products

With Natur-Al™ our customers can significantly reduce the carbon footprint of their premium products.

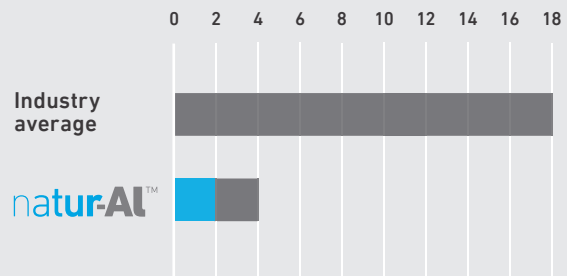

Natur-Al™ aluminum has direct CO₂ levels below two tonnes CO₂ per tonne of aluminium – **one of the lowest CO₂ footprints in the world for aluminium and less than one-quarter of the industry average.**

Natur-Al™ products are made with energy from 100% renewable sources at our Norðurál aluminum plant in Iceland. Norðurál is certified by the Aluminium Stewardship Initiative (ASI) for responsible production, sourcing and stewardship of aluminum. All CO₂ emissions are verified by independent third parties, facilitating life-cycle assessments for our customers.

The natur-Al™ Advantage:

- Direct and indirect CO₂ emissions less than one-quarter of the industry average
- Traceability from mine to metal
- Data available for use in life cycle analysis of finished products
- Third party verification of CO₂ emissions
- ASI-Certified for responsible production, sourcing and stewardship of aluminum

Direct and indirect CO₂ emissions

Natur-Al™ ZERO is our **fully offset, carbon-neutral aluminum**. We encourage and assist our customers to go all the way to carbon-neutrality with contributions to reforestation or wetland reclamation projects.

natur-Al™ Products:

Natur-Al™ comes in standard ingots (20-22 kg) in primary grades P0610, P1015, P1020 and primary foundry alloy grade A356. All products are made in Iceland in full compliance with EEU and local laws and regulations. All emissions that may adversely impact the environment are monitored by independent parties.
